

Bombardier CL-600-2B19 (GE CF34) Maintenance type rating T1+T2

EASA APPROVED

Course outline

This is a mechanics/avionics course according to Part-66 appendix III, type training and examination standard.

It describes all the airframe and power plant systems, sub-systems and components in details. This includes the operational and functional tests of all systems as well. Furthermore, the operational documentation is used to ensure that the trainee is able to correctly diagnose failures and take the necessary corrective action.

Concern & Objectives

This training concerns line and/or base maintenance engineers.

Upon completion of the course, the trainee shall be able to:

- Perform all maintenance tasks on the systems and up to the level listed in the related regulatory document.
- Ensure safe certification of line and/or base maintenance, inspections and routine work according to the maintenance manual and other relevant instructions and tasks as appropriate for the type of aircraft, for example: troubleshooting, repairs, adjustments, replacements, operational and functional checks.

Prerequisites

Trainees must:

- hold an EASA Part 66 license B1 or B2 or B1/B2, or equivalent
- be able to read, write and communicate at an understandable level in English language.

Training programme

TRAINING TIME:

- Theoretical training: 126H00: 18 days

Partnership with another PART147 organisation for practical training. Contact us form more information.

Remarks: If the type training is the first one carried out in the category of similar aircraft, the trainee will have to realize an OJT in a Part 145 organization.

Assessment

Theoretical examinations will cover all subjects of the theoretical knowledge syllabus with a minimum pass mark of 75%.

Supporting documentation

All provided by ICARE.
